RE: Harrisville Water District Year 2024 Public Water System Monitoring Requirements

Dear Supplier of Water:

The Year 2024 monitoring requirements for your community water system are **attached**. You are responsible for all testing and reporting of analytical results from an appropriate laboratory certified by New York State. Routine daily and monthly monitoring requirements remain unchanged.

Do not collect samples until your operator has contacted the writer or Mr. Curley.

You are responsible for preparing and distributing an updated Annual Water Quality Report (AWQR) **prior to May 31st** and certify that the AWQR was provided **by September 1st**.

All community water systems must develop and submit a lead service line inventory to their local health department by October 16, 2024. The inventory must be completed using the excel spreadsheet provided by New York State. If you need a copy of the spreadsheet template, email your request to wado@health.ny.gov. Additional Information and guidance on the LCRR can be found on-line at <https://www.epa.gov/ground-water-and-drinking-water/revised-lead-and-copper-rule>.

This letter and attached sample schedule must be displayed at the water treatment plant and be available for review upon inspection.

If you have any questions, please contact the writer or Mr. Curley at (315) 785-2277.

Sincerely,

Michael J. Tracy, P.E.
Professional Engineer 1
